About Us.

Who we are

Fabcab is a forward-thinking architecture studio grounded in innovation, universal design, and elegant environments.

What We Do

Fabcab captures your vision by pairing tailored architectural, structural engineering, and interior design services with our structural shell materials, creating beautiful homes for gracious living.

How we work with you

Fabcab collaborates with you to plan, design, and permit your project. We provide site-specific construction documents and guidance for your builder.

Timbercab Structural Shell Materials.

Timbercab Structural Shell Materials.

Timber Frame

Our custom Douglas fir timber frames celebrate the beauty and benefits of solid-sawn timber, CNC-milled with traditional mortise-and-tenon joinery and hidden metal fasteners. Computer-controlled milling ensures precise cuts, efficient assembly, and reduces material waste.

Posts, beams, and rafters

Structural Insulated Panels (SIPs)

Our wall and roof assemblies feature SIPs (high-performance panels combining structural strength, insulation, and sheathing). SIPs are precision-engineered and manufactured in a controlled environment. They offer energy-efficiency advantages, exceeding building code requirements, as well as faster construction times.

SIP wall panels

Timbercab Structural Shell Materials.

Windows

Our homes feature Andersen double or triple-pane windows with energy-efficient coatings, TruScene screens, low-maintenance exterior aluminum cladding, and Douglas fir wood interior to complement our timber frames.

Exterior

Interior

Patio Doors

Our homes feature Andersen full lite patio doors matching our windows. Compatible designer hardware trim options include FSB, Ashley Norton, and Baldwin. Additional finishes available.

Entry Door

Our Timbercab entry door is a Douglas fir stile-and-rail door and frame with matching side-lite(s). All glass is insulated and tempered. An Andersen full lite patio door is also available.

Ashley Norton

Ceilings

Our Timbercab ceilings feature Douglas fir car decking (tongue and groove boards) as a finished material for all exterior soffits and the interior vaulted ceiling; kitchen, bath and laundry rooms feature dropped drywall ceilings to allow space for mechanical and electrical coordination.

Siding

Our homes feature fiber-cement siding and panels which are fire-resistive and require little maintenance. Other choices include Cedar, Thermally-Modified Wood, and Shou Sugi Ban.

Roofing

Our homes incorporate standing seam metal roofing for longevity and aesthetics. Features include field-crimped seams for increased strength and durability, as well as a concealed clip/fastener system. Color choices include options for higher solar reflectivity (SRI).
